

SAKTHIVEL MAYILSAMY

Full Stack Developer · React · Spring / Java · REST APIs · AWS / GCP · CI/CD
+1 (647) 957-1139 • sakthivel.mayilsamy.dev@gmail.com • linkedin.com/in/sakthivel-mayilsamy-b8463585 • Waterloo, ON, Canada

PROFESSIONAL SUMMARY

Full Stack Developer with 6+ years of professional experience building and shipping production web applications using React frontends and backend services. Hands-on expertise in RESTful API design following OAS standards, CI/CD pipeline management, Git-based version control, and Agile/Scrum delivery. Experienced working cross-functionally with Product Managers, DevOps, and UI/UX designers to deliver user-facing features at scale. Cloud-certified (AWS Solutions Architect) with practical exposure to GCP and Azure. Strong background in requirements gathering, technical design documentation, incident and defect resolution, and root cause analysis. Legally authorized to work in Canada.

TECHNICAL SKILLS

Frontend	React.js, JavaScript (ES6+), HTML5, CSS3, Bootstrap, Tailwind CSS, AJAX, Angular, Responsive UI Design
Backend	Python (Django, Flask, FastAPI), Spring Framework, Java, REST APIs (OAS / OpenAPI), Celery, RabbitMQ
Testing	Jest, PyTest, NUnit, Unit Testing, Integration Testing, Performance Testing, Test Case Authoring
CI/CD & DevOps	GitHub Actions, Jenkins, GitLab CI/CD, Docker, Kubernetes, Heroku, Terraform, CI/CD Pipeline Design
Cloud	AWS (EC2, S3, RDS, Lambda, Glue), GCP, Azure — cloud-native service deployment and management
Databases	PostgreSQL, MySQL, MongoDB, DynamoDB, Snowflake, SQLite, Oracle — schema design & query optimization
Practices	Agile / Scrum, Git / GitHub / GitLab, Code Reviews, Root Cause Analysis, SDLC, Technical Documentation
Other	Elasticsearch / Logstash, Tableau, Matplotlib, PySpark, Airflow, Hadoop, C#, Unity 3D

PROFESSIONAL EXPERIENCE

IOU Financial Application Developer	Sep 2024 – Present · Waterloo, ON
- Developed and shipped React.js frontend components integrated with Python Flask RESTful APIs, delivering responsive, user-facing features across production web applications following OAS interface standards. - Designed and optimized RESTful API services in Python Flask and Django consumed by dynamic React frontends, applying consistent OAS/OpenAPI documentation standards across all endpoints. - Participated in full SDLC lifecycle — requirements gathering, technical design documentation, development, testing, and production deployment — contributing to both feature delivery and system reliability. - Conducted and participated in peer code reviews via GitHub pull requests, enforcing coding standards, improving code quality, and identifying defects early across 5+ concurrent feature branches. - Authored and maintained process documentation, technical design documents, and impact analysis reports to support cross-team knowledge sharing and audit readiness. - Led and participated in incident, problem, and change management activities including root cause analysis and proactive defect prevention to maintain platform stability. - Wrote unit and integration tests using PyTest across backend services, increasing code coverage and reducing production bug recurrence rate.	

- Implemented asynchronous task queues using Celery with RabbitMQ, improving background processing throughput and frontend responsiveness under load.
- Configured Logstash pipelines to filter and forward structured log data into Elasticsearch, enhancing system observability and accelerating incident diagnosis.
- Deployed production releases via Heroku-integrated GitHub Actions CI/CD pipelines, enabling reliable continuous delivery with reduced manual intervention.
- Participated in Agile ceremonies — daily stand-ups, sprint planning, and retrospectives — consistently delivering committed features within sprint timelines.

iStudio Technologies | Full Stack Developer

Oct 2022 – Mar 2023 · Remote

- Built React.js admin dashboards with real-time data feeds from FastAPI and Flask backends, delivering user-facing analytics and content management interfaces for non-technical stakeholders.
- Designed and maintained RESTful backend services following OAS standards, managing player data, session tracking, and scoring for a production platform serving concurrent users.
- Authored technical design and support documentation for all backend services and API contracts, supporting onboarding and cross-team collaboration.
- Deployed services on AWS (EC2, S3, RDS) using Docker and GitHub Actions CI/CD pipelines, reducing deployment cycle time and eliminating manual release steps.
- Designed PostgreSQL and MongoDB schemas for user profiles, events, and session data; optimized queries to support efficient reporting and analytics.
- Wrote unit and integration tests for all backend APIs, maintaining a stable, production-ready codebase through full launch cycle.
- Collaborated closely with Product Managers and UI/UX designers in Agile sprints to translate requirements into working features, participating in stand-up operations meetings throughout.

Curious Crew Advisory Services LLP | Full Stack Developer

Sep 2021 – Mar 2022 · Remote

- Designed modular Python Flask REST API backend with OAS-compliant endpoint documentation, enabling seamless content updates without application redeployment.
- Built React.js content management dashboards and user feedback tools used daily by client stakeholders, delivering intuitive user-facing interfaces from UX requirements through production.
- Managed PostgreSQL session tracking and interaction data pipelines, capturing analytics used to drive iterative feature improvements across multiple release cycles.
- Deployed backend to AWS (EC2, S3) using Docker containers and GitHub Actions CI/CD pipelines; participated in incident and change management activities to maintain service reliability.
- Collaborated with business stakeholders and cross-functional teams to gather requirements, translate them into user stories, and deliver tested features on schedule.

Creative Monkey Games & Technologies | Full Stack Developer

Oct 2019 – Jun 2021 · Remote

- Built React.js operator dashboards and monitoring interfaces connected to real-time FastAPI backend services, enabling live visibility into platform health and user metrics.
- Designed and maintained RESTful FastAPI services on PostgreSQL handling concurrent user sessions, leaderboards, match history, and real-time data synchronization at scale.
- Implemented Docker-based CI/CD pipelines with GitHub Actions on AWS (EC2, RDS, S3), supporting rapid patch releases with zero-downtime deployments.
- Authored test cases and conducted integration and regression testing prior to each release; participated in root cause analysis for post-launch incidents and service requests.
- Participated in Agile sprint planning and retrospectives; contributed to requirements, user stories, and use cases in collaboration with Product Managers and stakeholders.

- Developed and deployed full-stack web applications for B2B clients using Python and modern web frameworks, translating business requirements into technical specifications and working features.
- Built and delivered an inventory management system with OMS and payment gateway integration, improving client operational workflows and reducing manual processing.
- Conducted thorough unit testing, integration testing, and cross-browser QA; maintained applications using Git version control with documented change and release tracking.
- Authored process and support documentation for all delivered systems, enabling client teams to operate and maintain solutions independently post-handoff.

EDUCATION

Post-Graduate Certificate — Virtual Reality Production · Conestoga College, Kitchener, ON	Jan 2024 – Aug 2024
Post-Graduate Certificate — Project Management · Sault College, Sault Ste. Marie, ON	May 2023 – Dec 2023
Bachelor of Engineering — Computer Science & Engineering · Akshaya College of Engineering & Technology	2011 – 2014

React Frontend Development · RESTful APIs & OAS Standards · Spring / Java Backend · CI/CD Pipelines · Git & Code Reviews · Agile / Scrum · Incident & Root Cause Analysis · Technical Documentation · AWS / GCP · Unit & Integration Testing · Cross-functional Collaboration
